

How to Revise: Maths

1: Know what you need to work on

Use your Cycle QLAs (results breakdown) and practice papers to pick out topics you need to work on. Don't pick things you already know!

2: Know where to get questions to work on

The only way to revise maths **is to do maths**. When you find a topic you need to work on, you need some questions on that topic. There are a few places to go:

www.corbettmaths.com

Corbettmaths

5 a day – Videos – Worksheets –
Practice Papers with model solution (H&F)

www.onmaths.com

Predicted Papers – Topics (filters for (H&F))
Demon Questions and Mini mocks
If you register then onmaths.com will keep a track/record of progress

PiXL Maths App

– School Id: MC6197
– User id: SurnameFirstinitial _____
– Password (unless changed) : maths1

GCSEPod –

You need to login using your school email address via office 365

- Go to the TEACH icon – maths – Edexcel – You can now browse the key areas or search for a topic and watch the video clip.
- Email: FirstinitialSurname16@macclesfieldacademy.org

3: Know where to get help

Because you'll be revising things you got wrong on your cycle tests, practice papers or things you know you need to work on, you're bound to get stuck frequently! Knowing where to get help so you can work independently is vital: Use the above sites and your revision guides too.

If you really are unsure then please ask (or email) your teacher!
